COMMENTS (Use reverse, if necessary)

AFCIN-2C4/Col Rizon/56270

1. The Guided Missile Intelligence Committee operates in compliance with DCID 314 which states in part that:

"Full and free interchange among all agencies of information which has utility for intelligence relating to the national security is essential. This policy pertains especially to intelligence information, finished intelligence, and information on internal and external intelligence research programs."

To accomplish this interchange of internal and external intelligence research programs, it is necessary that the Secretariat be provided with the intelligence production effort of each member agency. These programs will then be correlated into a single informal document.

2. It is requested that this information on research being performed by your support groups or outside contractors be forwarded in a format similar to that attached. The classification level may include CODEWORD.

3. Since this correlation should be accomplished as soon as possible, your contribution is requested by 25 October 1958.
